Coronavirus and Lenthor Engineering’s Operational Status/ Update

As we all move forward under a Shelter-in Place Advisory conditions are changing almost daily. We will continue to provide you updates to our condition as they develop.

To continue in an operational status Lenthor is using several exemption rules provided under both, Support of Essential Businesses and the need to Maintain Internal Essential Operations for the business.

Many of our military and medical product customers have sent letters of confirmation to these exemptions. During these times we have been working with local officials confirming our understanding and allowing us to use these specific exemptions. With their approval Lenthor Engineering is preparing to ramp up production in all areas of manufacturing while still minimizing the work force to allow for proper social distance standards.

This action ensures that Lenthor is able to continue to move product and continue to deliver against your orders. We are fully open for business, ready and willing to support your requirements. We will continue to advise you of any changes that could potentially alter our current course. These measures are expected to last only until the advisory is lifted on April 7.

We have enabled all of our front end sales support functions and personnel, Sales, Sales Engineering, CAM Engineering and Production Planning to be fully functional should we need to work remotely. This action will enable us to continue to serve all of our customers’ needs with new design reviews, technical support, quoting, accepting your purchase orders, Design Review DFM’s and Production Planning.

Everyone at Lenthor Engineering is appreciative of your support and we hope all of you and your families remain safe.

Please be assured that we have put in place all of the practical work place habits being emphasized by our health professionals. These measures are being enacted in order to mitigate the potential risk of exposure to our employees, their families and our community as a whole.

Our very best to you all...

Mark Lentzoni
CEO/President Lenthor Engineering
